

# REVIEW and REINFORCEMENT

## The Five Kingdoms

### Section 4-3

#### KEY CONCEPTS

▲ Today, the most generally accepted classification system contains five kingdoms: monerans, protists, fungi, plants, and animals.

#### ■ Building Vocabulary Skills: Applying Definitions

In your own words, write a definition for each of the following terms.

1. Autotroph \_\_\_\_\_  
\_\_\_\_\_

2. Heterotroph \_\_\_\_\_  
\_\_\_\_\_

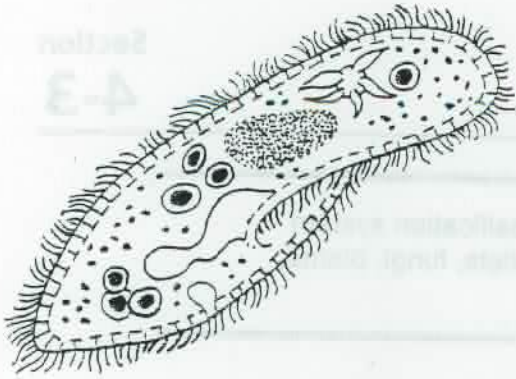

Now apply your understanding of the definitions by labeling each of the following organisms as either an **autotroph** or a **heterotroph**.

1. \_\_\_\_\_

2. \_\_\_\_\_

4.

6.

Review the information in Section 4-3. Complete the chart by using + to indicate that the description is true and - to indicate that the description does not apply.

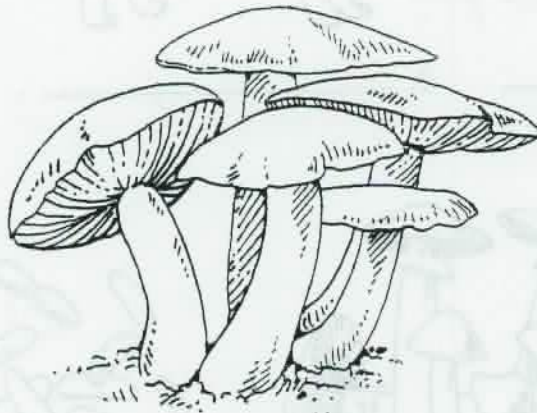

Name \_\_\_\_\_ Class \_\_\_\_\_ Date \_\_\_\_\_

	Unicellular	Multicellular	No Nucleus	Nucleus	Autotroph	Heterotroph
Mosses						
Protists						
Fungi						
Plants						
Animals						

7. \_\_\_\_\_

8. \_\_\_\_\_

9. \_\_\_\_\_

## ■ Reviewing the Five Kingdoms: Understanding the Main Ideas

Review the information in Section 4-3. Complete the chart by using + to indicate that the description is true and a - to indicate that the description does not apply.

	Unicellular	Multicellular	No Nucleus	Nucleus	Autotroph	Heterotroph
Monera						
Protista						
Fungi						
Plants						
Animals						

## ■ Applying Knowledge: Using the Main Ideas

Label each of the organisms with the name of the kingdom to which it belongs. (Monera, Protista, Fungi, Plant, Animal)

1. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_

4. \_\_\_\_\_

5. \_\_\_\_\_
